The GHGRP requires reporting of greenhouse gas (GHG) data and other relevant information from large GHG emission sources, fuel and industrial gas suppliers, and CO2 injection sites in the United States.

Universal Metal Products has seen a 28% decrease in our Scope 1 & 2 emissions in 2023 from a base year of 2016. We would like to remind our customers that we remain committed to our ongoing initiatives in this area.

Sincerely yours,
